TACTICAL

Rapid Emergency Evacuation Litter

A PSI Tactical Product

The **REEL**, Rapid Emergency Evacuation Litter is a revolutionary, lightweight evacuation litter/stretcher specifically designed to meet the needs of tactical field care and aeromedical transport. It has been tested to Joint En Route Care Evacuation Test Standard (JECETS) safety during casualty evacuation.

The **REEL** Litter enables the war fighter to carry patients for extended distances over rough terrain. Its lightweight and man-packable design are ideal for dismounted, off-set, and Helicopter Assault Force (HAF) Missions. The materials are ultra-tough Dyneema and aircraft-grade aluminum. The litter system can be deployed in seconds to become an efficient patient carrying platform.

SPECIFICATIONS

- **Lightweight:** Less than 16.5 lbs (7.5 kg) total carry weight
- **Strong:** Carries over 1,100 lbs (400 kg)
- **Compact:** Stows to 24" x 9.8" x 7.0" (62 cm x 25 cm x 18 cm). Deploys to 90" x 22.5" x 6.5" high. (229 cm x 57 cm x 16.5 cm)
- **Tough:** Field tested in the harshest conditions including sand, mud, dirt, and extreme temperatures.
- **Fast:** No training required. Unfolds in less than 20 seconds
- **Easy to own:** The **REEL** can be field-stripped and parts/bed exchanged with no tools. No maintenance lubrication or cleaning needed.

For more information on how the REEL can improve casualty evacuation and recovery, or for a FREE demo, please contact us today.
